Forecast for Thursday 17 Dec 2020

Weather: Frequent showers in the morning, some longer spells of rain across Lochaber and Skye at first, snow above 1000 metres. Becoming mainly dry in the afternoon but rain will return from the west by early evening.

Chance of cloud free mountain/hill tops above 800m: 50%. Some cloud down to 600 metres expected on southwestern upslopes of Skye and the south in the morning, this thinning in the afternoon. Low cloud becoming more extensive from the southwest after dark. Best of the cloud breaks during daytime will be in the northeast of the area.

Visibility: Mostly very good outside of cloud and showers.

Met Office Aberdeen Meteorologist's View
Icy surfaces expected on the very highest tops.

Forecast for Friday 18 Dec 2020
Weather: Low confidence for detail. Apart from some light rain in the coastal southwest the morning should be dry. The afternoon will be cloudy with widespread heavy rain spreading from the south, this lasting into the evening. Thaw of any lying snow at higher altitudes as freeing levels continue to rise in the afternoon.

Maximum wind: Summit southerly severe gales or storm force winds expected, gusts to 70 mph over the higher tops.

Chance of cloud free mountain/hill tops above 800m: Little in the way of low cloud in the morning. Low cloud becoming somewhat more widespread between 600 and 800 metres in the afternoon and evening.

Visibility: Mostly good outside of cloud and rain

Temperature: **Glens:** Plus 3 rising to 10 Celsius
At 800m: Plus 7 Celsius
Freezing level: Above summits
